Now, when someone leaves a comment on your photo or a post, you can edit it without leaving the platform, and comment on specific parts of it. Upon sending a comment, tapping the magnifying glass icon will let you choose the specific portion of the comment you'd like to edit. Once you do, a new interface appears allowing you to make changes to the comment. This interface also allows you to make the change in one location and quickly send back the comment as you see fit. Once you make changes 0cc13bf012
