Quick Preview for Soundcloud is a nifty, little extension for Chrome that provides you with the easiest way to preview a track, by merely hovering over the Play button with the cursor. Keep the cursor over the Play button for a little while, and you're bound to discover that the extension provides you with four short samples. Even better, it allows you to preview content without losing the progress of any ongoing or playing tune. In short, the currently playing tune is automatically paused while the preview process of any other song takes place. It almost goes without saying that the progress is automatically resumed once the cursor leaves the Play button's area. Simple installation, even simpler functionality Quick Preview for Soundcloud can be deployed on your computer's Chrome browser with the minimum amount of effort, directly from its official Chrome Web Store page and it works regardless if you're logged in to Soundcloud or not. As you may have gathered based on its straightforward functionality, this is a very lightweight extension that, just like most other tools of this sort, lives in Chrome toolbar, on the right side of the address bar. A web-based SoundCloud player in JavaScript that parses the HTML page for element. The script loads the soundcloud.js JavaScript library, which loads the player.js. On success, it opens the HTML page. What makes SoundCloud's player special is that it adds the code to the HTML page and thus integrates the soundcloud.js script directly with the page. The result is that you can click on the "Pause" button and the player will be automatically paused, unlike with other players that simply open a new page when you click on the button. Note that the name of the player.js script is "Player", not SoundCloud Player. SoundCloud is a social network that hosts sound recordings and music videos from amateur musicians and hobbyists. The site allows listeners to follow other users, comment on their recordings, play related songs, or share their personal links with their friends. SoundCloud users can choose whether to make their recordings public or private. Users can also tag their songs or upload multiple songs to a playlist. SoundCloud is a web-based service that allows users to listen to, create, and share music. Users upload content to a centralized online library where it can be downloaded, shared, and embedded on blogs, websites and other
