Over 700 of the best natural textures ever found on the web. From metals to marble, papers, to grass, wood, marble, to paint and clay, this set of textures has them all. There are several layers in some textures, so you may end up with twice as many objects in the texture. Note that some of the surfaces are designed to be used with off-set backgrounds for a random-2D look. ** This download is NOT the VirtualBox version. There is a ZIP file of that software as well. It is only a zip file with a txt file inside with the text showing what the file is. Everything that is written in the txt file is the name of the file but it is not written on the txt file itself. **There is a second version of the textures. It does NOT have the same folder name. It is the version I got from it's source.
