AutoCAD Cracked Accounts 2018 is built on Microsoft .NET. History AutoCAD was originally written in the programming language Lisp, but was rewritten to C Source in 1985 and then converted to Microsoft .NET in 2011, opening up the source code for public viewing. The classic macros in the Lisp-based language were replaced by VBA macros and the AutoLISP language. User created macros were being added to AutoCAD for years but AutoCAD never offered any editing features for them. In 2012, the Autodesk Exchange Apps store was launched to publish AutoCAD and other Autodesk software add-on applications. By 2012, Adobe Lightroom was being used to edit images, but due to security issues, Autodesk .NET allowed export of images to the same types of editing software as found in Adobe Lightroom. Photoshop and PhotoShop were available to automate functions. Adobe Dreamweaver was added in 2013 for web design automation. In 2013, the Autodesk Exchange Apps store was updated with the addition of Dreamweaver, Photoshop and PhotoShop. In 2014, the Autodesk Exchange Apps store was updated with Visual LISP to import and edit images. This was followed in 2015 with .NET, which was upgraded to the Microsoft .NET Framework 4.5 and made available as part of the 2013 release of AutoCAD 2015. In 2016, Autodesk introduced ObjectARX to AutoCAD as a C++ class library. Scripting languages AutoCAD supports the use of a variety of scripting languages. Some of these include AutoLISP, VBA, ObjectARX and Visual LISP. Scripts written in AutoLISP can be saved as a stand-alone file and then imported and run in AutoCAD as regular source code, the developer's code is interpreted at run time and not compiled into a separate file. AutoLISP is installed with AutoCAD. AutoLISP is mainly used for automating routine functions. AutoCAD 2008 supports over 2000 commands of AutoLISP. The a1d647c40b
