I've been looking to find how to to format a Date Object, and basically all I can find are ways to format any Date you put into there.

What I'm trying to do is set a Date and time (now), but I want to just display the month of the month. So, say I get the date back as below, how would I just output the current Month? Sun May 12 2019 at 6:00pm GMT-0600 (MDT) In the simplest form I'm looking to do: `var d = new Date() console.log(d.getMonth())` But I can't seem to find anything on how to do so with a Date Object. A: Month Numeric (i.e. 0 - 12), day count is 1-31, and months 1-12. Fingerprint identification techniques by means of wavelet transform. A new fingerprint image coding method is presented and the corresponding algorithm is also proposed to quantitatively extract features of the fingerprint ridges and valleys. Firstly, an original fingerprint image is transformed by the well-known wavelet transform (WT) method, and the 2D wavelet transform of the fingerprint ridges and valleys is obtained. Then, the spatial resolution is adjusted by using the dominant frequency  $F1$  of the wavelet transform image, and the ridge flow frequency  $F2$  of the gray image is obtained. As a result, the ridge and valley network information is found by the ridge frequencies  $F1$  and valley frequencies  $F2$ ; three fingerprint identification models are proposed to identify the ridges and valleys of an unknown fingerprint by the feature frequency extraction method. When the ridge frequencies of the unknown ridge image and the ridge frequency of the reference ridge image are obtained, the ridge numerical wavelet transform
