Players can also use equipment to enhance the strength of their attack." "When compared to other games, the old-style action moves are not especially rare. The enemy AI is very good, so you should feel the same excitement during the battles as you would from the original." Famitsu "The game is set up to take advantage of the large-scale MMO. Players can enter closed spaces to fight, and the players can attack other players who are in the same area." "While many other games of this type only have two different types of attacks, this game has three different types of attacks and three different types of skills. This is really interesting!" "It's fun to let you choose skills for each monster and use several battles to learn skills." "The real time battle makes you feel you are really in a fantasy world." bff6bb2d33

When recruiting additional members, it is necessary to convey a clear message to attract people. Since the message is that we will "revolutionize" the market, "we need intelligent, passionate, and motivated people", this means an important role is to convince people. The position of a leader that will encourage people to join perfectly illustrates this point. And that is the point of this video.

The faithful is depicted in the game. Although you can recruit your own faithful, you can also recruit by sending your representative to a supported village.

A message to recruit loyal people will be given in the game.

Since it is assumed that new members will be significant to the game, you can get a game off with it.
