The Thought That Counts The Thought That Counts WALTER FARRER I have no ambitious hopes or high ambitions for my audience, and I am not afraid to tell them so. I know they will not put up with much. I have no longings for reputation, no sensationalism and no sensationalizing, I am not greatly concerned to see the latest work get 'big', and I am not inclined to go to any lengths to meet their social needs. I am my work, and it is what I am. I am not doing anything new - and I am not trying to be new, either. And I have no grounds for complaint if, in the future, they should say of me that I have not created any new thought or ideas or done anything new. My central concern is my work and nothing else. Of course, if my work reflects a shallow understanding of some facet of life, then I am not very proud of my work. But I am always glad to be taught. And I hope that in due time I shall be. I know a very fundamental and constant truth, which is the truth that is - and it will bear me, and my work, any test

"Epic and diverse content, a large variety of optional elements and a huge setting, all of which makes the game a masterpiece of all the genres." "Undoubtedly a vast masterpiece, a work of art fit to stand side-by-side with other popular games. Positives 100% Beautiful graphics. The main character can summon a talisman item that is not, to many people, a big issue. This item can activate a new character, a new system that appears as a new character, or your equipment changes. In addition, the transformation process is done by playing the game. I recommend playing using the new talent. Overall, it is a great choice for the players who are not able to experiment with playing the game. 100% A sense of action. The sense of action is super fluid, and the player's character moves smoothly. The ability to select a shield or play with the pull ability in some parts is also a sense of action. 100% A sense of variety. I did not get bored at all during the game. The enemy appearances change according to the level, and the number of non-human enemies has increased. The battle strategies are also changed at various times. You can enjoy the battle with your strategy based on your character's skills and the enemy's attack patterns. 100% The crystal items should improve. I couldn't experience all the activities, but I have received various feedback that you can obtain more items from the crystal area. 100% Replay-ability. The game has the kind of replay value that will make you play it over and over again. The replay value is extremely high. I recommend playing using the new talent. I recommend playing using the new talent. Overall, I recommend it as a game that you can enjoy even once." "In many different genres, fantasy RPGs has the potential to truly excel." "The battle system, graphics, and online parts of the game are all great." "There are many upsides to this game, from the graphics to the battle system. The characters' expressions and music give off an epic feeling when in battle, and I recommend playing using the new talent. I recommend playing using the new talent. Overall, I recommend the game."
