I have been struggling with this problem for a couple of hours, I read a bunch of documentation and can't find a solution. I have an array of dictionaries (e.g. {'a': 1, 'b':2}) that I need to convert to a list of dictionaries, so I can iterate over them and add a variable or do other things. Can someone help me? This is my current solution which is not working: --- - name: remove copied files template: src: "backup_files.yml.j2" dest: "{{ path_to_file }}/backup_files.yml.j2" owner: root group: root mode: 0644 state: absent delegate_to: "{{ master_host }}" A: It's not a list of dictionaries. It's an array of dictionaries. You can map() a data structure to a list. - hosts: localhost tasks: - debug: msg: "{{ item.a }} - {{ item.b }}" with_ d0c515b9f4
