

Shari’ ah Umdaat Chapter 1 At-Taharah : A Basic Textual and Cultural Introduction to Shi`a Islam Chapter 4 Al-Akhbar The Challenge of Dawa (Propagation of Islam) in a Changing World Chapter 5. The event celebration held after the announcement of result of 12th Board examinations in June'09 at the famous Aligarh Muslim University had completed onHaving a hip-replacement might be a healthy option if you are over 40, no matter how active you are. The greatest health benefit is that a hip-replacement is risk free. There are very few risks associated with this procedure, and it is the only way a healthy person can recover from a hip fracture. Who is at Risk for a Hip-Replacement? Your hip can easily become worn through changes in your hip joint and the supporting muscles. Often, if a person is overweight or inactive, this process will occur over a period of decades. The bones, joints, and surrounding muscles and tendons can also start to break apart. But there is another factor at play. Under certain conditions, the blood flow can become inadequate. Adrian Snead, a certified orthopedic surgeon, explains it this way: "Hip replacement is an incredible solution for those individuals who have hip-joint problems that are caused by osteoarthritis and are unable to take the normal stress load of walking and performing normal activities of daily living." When can you get a Hip-Replacement? A hip-replacement is often needed if pain from a fracture is still present after surgery. Also, a revision hip-replacement may be needed if there are multiple hip problems and the joint degeneration cannot be corrected through other methods. Your surgeon should thoroughly assess the severity of your hip-related problems, and determine whether a hip-replacement is the most appropriate solution for you. Which Hip-Replacement Options are Available to You? A hip-replacement can be done with hip prostheses that have been inserted. These are fairly common among older adults. For more severe conditions, a femoral component, which is the part of the hip-replacement that replaces your femur, may be implanted. Sometimes a stem implanted with a femoral component can be used, if the hip-replacement that you need is available. A cup, which is a prosthetic implant, that is attached to
