BatchIt! is an efficient batch file building tool, but its expertise and capabilities don't end with that. It can help you write a variety of programs for automation and advance your skills, improve your teamwork capabilities or generate reports for easy management and analysis. Why do you need it? You have to perform a lot of repetitive tasks and you want to create a batch file so you can automate them without writing a program from scratch. You want to create a batch file but don't have time or need to learn how to write them from scratch. You want to save some time and have more free time to spend on other things. You have a set of scripts and you want to organize them as a collection. Features A unique set of features makes BatchIt! much more useful than the well known and basic batch file building tool. The following features make it unique: • Macro support. Create your own and reuse them. Save the time you would have spent on retyping the same commands again and again. Save the commands to a separate file that will be executed on the fly. • Fast Batch Writing. The macro tool lets you create your own shortcuts and jump to them right away. Just drag and drop a script component to a link and you're done. • The Ultimate scripting in One Place. There are over 200+ scripts included in the program. You can't be limited by the poorly written scripts. A script in the library is powerful and useful. • Advanced Search & Replace. You can search & replace a text string within a file (file.html) or with a specific string. • Easy Batch Executing. You can launch a script right away by clicking it. You can also run it at a specific time or on a scheduled event. • Batch Execution Support. Create batch files that run on scheduled events, copying files, deleting files or updating files. • The advanced predefined macros give you full command over your automation. You can type the commands without using the macro tool and the tool will create your scripts on the fly. • Resource pooling. You can easily create several identical files or script functions to shorten the time spent. • Customizable themes. Customize the look of the batch editor. Now you can make your own and apply it to all scripts. • Get to know the scripts and functions contained in the library before learning how to program. • Create professional automated programs that can manage multiple tasks automatically and
