Of course the material is often inferior to the original sets, but it does have various bonuses for the player. In this case you will need to balance the utility of the bonus, the time it takes to acquire the material and how well it can be used.Finally I want to stress that the material for the new weapon sets is totally separate from the weapons. You don't need them to make the weapon, so you could buy them for gold. Not only does this add a nice bit of variety, the material you gain from defeating enemies with those weapons can't be used on the new weapon set, so they will stay in your inventory. You will also be able to use those materials in the construction of Bunker Materia and in the high-end modules in the Bunker.Hope you can use this information to build your own epic battle against the Chinese in the new United Front game mode. ParadoxSarge_ChanUnited Front is a new and unique 'endless' Defense in Depth game mode, where players battle along a hexagonal border that has been reinforced with bunk
