I tried to provide the required details for initiating code from an external git repository in VSTS git, but ended up with errors. The import request cannot be... I'm trying to import a file from an external git repository into VSTS Git. It works without problems until I try the following action: pull import-module project-name from .git/modules/proj I am getting the following error: Import request failed: Cannot perform action 'import-module' on module 'project-name' because its code does not match the code being imported. This happens when I try to import to another folder.
